HOOTOWL · ENTERPRISE OWL

Your Starter Kit

Everything you need to get your AI receptionist answering your business calls, in about 15 minutes.

$100 / month **200 AI minutes every month** **Your own HootOwl number**

Questions? Email info@hootowl.net · Your workspace: hootowl-lead-recovery-production.up.railway.app/portal

WELCOME ABOARD

What your Enterprise OWL plan includes

☎ Your own HootOwl number

A business line in your area code when one is available. Put it on your website, truck and Google profile.

✎ An AI receptionist

Answers with your greeting and voice, collects each caller's name, address, service needed and problem, and saves it as a lead.

200 200 AI minutes a month

Resets on the 1st. When they're used, calls simply ring your phone until the next month.

↻ Forwarding and a lead inbox

Calls forward to your phone, and missed calls and leads are saved in your HootOwl workspace.

Set up in six steps

1 Accept your invitation

Open the welcome email from HootOwl and click your personal link. Create a password of at least 12 characters. **Link works for 7 days**

2 Get your HootOwl number

In your workspace, open **Plan & security**. Enter the area code you'd like, tick the consent box, and click **Set up my phone number**.

3 Add the phone that should ring

Open **Business**. Under *Forward incoming calls to*, enter your cell number with country code, like +19405551234, and click **Save number**.

4 Meet your AI receptionist

Open **AI receptionist**. Name your assistant, write your greeting and closing line (ideas on the next page), list your services and area, and pick one of six voices. Click **Save receptionist**.

5 Hear it yourself

Click **Call me to preview**. We call your phone so you can talk to your assistant like a customer would. Tweak and preview again until it sounds right.

6 Go live

Tick **My receptionist is ready — answer my calls with AI** and save. That's it: your HootOwl number is now answered for you.

MAKE IT SOUND LIKE YOU

Greeting ideas

Your greeting is the first thing every caller hears. Keep it short and friendly, and say your business name.

> "*Thanks for calling Smith Plumbing! How can we help you today?*"

> "*Hi, you've reached Lone Star Heating and Air. What can we do for you?*"

> "*Hey, thanks for calling Red River Roofing. What's going on at your place today?*"

Closing line ideas

Said after your assistant saves the caller's details. Only promise what you can deliver.

> "*Thanks! We've got your details, and someone from our team will call you back shortly.*"

> "*Perfect, you're all set. We'll call you back today to schedule your visit.*"

How your 200 AI minutes work

- Your assistant answers calls to your HootOwl number while you have minutes left this month.
- Each call uses its length in minutes, rounded up. A typical call takes 2 to 3 minutes, so 200 minutes covers about 66 to 100 calls.
- Once they're used, calls ring your phone like normal call forwarding. Nobody hits a dead line.
- Your minutes reset on the 1st of every month. You can see this month's minutes on your **AI receptionist** page.
- Preview calls you make to yourself don't use your minutes.

Our largest plan. If you regularly need more than 200 AI minutes a month, email info@hootowl.net.

GET THE MOST FROM HOOTOWL

Five ways to get more calls

- **Google Business Profile:** make your HootOwl number your listed phone number.
- **Your website and social pages:** put the number at the top of every page.
- **Truck, yard signs and invoices:** one number everywhere, answered every time.
- **Your old voicemail:** record a short message pointing callers to your HootOwl number.
- **Call back fast:** check your workspace inbox and return every lead the same day.

Good to know

Will callers know they're talking to AI?

Yes. Your assistant is friendly and natural, but it never claims to be a person. If someone asks, it says it's your virtual assistant.

Does it text my customers?

No. HootOwl handles phone calls only and never sends texts to your callers.

Can it book appointments?

It collects each caller's name, address, service and problem and saves them as a lead, so you can call back and set the time.

What if someone has an emergency?

If a caller mentions danger such as fire, smoke, a gas smell or sparks, your assistant tells them to hang up and call 911 first.

How do I change my greeting or voice later?

Any time, on your **AI receptionist** page. Save, then use **Call me to preview** to hear the change.

Your launch checklist

☐ Accepted my invitation and created my password
☐ Set up my HootOwl phone number
☐ Added the cell number that should ring
☐ Saved my assistant's name, greeting, closing line and voice
☐ Made a preview call and liked how it sounded
☐ Ticked "ready" so my assistant answers calls
☐ Put my HootOwl number on Google, my website and my truck
